SIOUX FALLS, S.D. (AP) - Forty years after the 73-day occupation at Wounded Knee, there is still lots of pain and many questions about what truly happened.

That's according to an author of a new book examining the occupation and the last meeting between all the major players.

Stew Magnuson is a Washington-based journalist. He will be in Sioux Falls on Saturday to present his new book, "Wounded Knee 1973: Still Bleeding," at the Dakota Conference at the Center for Western Studies at Augustana College.

"Wounded Knee 1973: Still Bleeding," which is published in ebook and traditional form, tells the story of the occupation and the gathering of the major and minor characters at last year's Dakota Conference.
